LAND SURVEYOR (LSI or PLS) – JOB DESCRIPTION

About our COMPANY

JD McGee, Inc. is a Civil Engineering and Land Surveying firm that provides services which help solve problems for clients. Typical clients include private owners, prime consulting firms, developers, contractors and some municipalities. JD McGee, Inc. is a small, Christian family-owned engineering firm. See the company web-site for more information at jdmcgee.com. We are located at 1215 Main Street, Philomath, OR. JD McGee, Inc. is an equal opportunity employer.

JOB SUMMARY

This is a full time, permanent technical position in the surveying consulting field. The position will be part of an office team of engineers, surveyors, and technical/administrative support personnel. Day to day job responsibilities vary and will depend on the candidate's individual experience and skills. The successful candidate will work under the direct supervision of a professional civil engineer and/or land surveyor.

Typical Projects include: land divisions, property line adjustments, boundary surveys, water rights surveys, easements, topographic survey work for (our) design of industrial, commercial, and residential sites, construction staking for our site designs, as-built surveys of our projects, sometimes surveying for indoor placement of industrial equipment, flood elevations, and some construction staking for projects designed by others.

EDUCATION AND REQUIREMENTS

- Associate degree in land surveying is required or the ability to show experience based knowledge.
- Experience with CAD required.
- LSI preferred.
- We desire a candidate who is serious about pursuing professional licensure.

- This position will require working independently in the field with a robotic total station or RTK GPS system; sometimes with an additional field crew member.
- Applicants must have field surveying experience/training as well as good math and communication skills.
- The successful candidate will have the ability to organize and prioritize the work load balancing the needs of several project managers/Clients.
- Must be experienced in preparation of survey maps for exhibits and recording and creating topo maps from downloaded data.

- Must have a valid Driver's License with a clean driving record.
- Lifting equipment (30-60 pounds) will be required.
- Work will often be outdoors in all kinds of weather. Applicants must have the ability to walk long distances over rugged terrain while carrying equipment.
- *Preference may be given to those applicants with experience in construction and related activities, as well as surveying and drafting.*

COMPENSATION AND BENEFITS

The wage will be negotiable based on the applicant's qualifications and experience. Benefits include: paid holidays, paid sick leave, paid vacation, provision for health insurance, and retirement contribution plan upon meeting eligibility requirements.

Application: To apply, email three things: a resume, transcripts (if appropriate) and cover letter to: Kay McGee, Business Manager, at kaymcgee@jdmcgee.com. *Letters of reference may also be submitted. A work sample may be submitted or requested. Successful candidate may be given surveying skill test and/or problems to attempt during the interview process.*
